- ▶ For website design, template will be provided to get approval then website will be developed.

SPECIAL UNIDO OFFER

- ▶ Point Of Sale Software

There are several benefits to automating your store with a Point of Sale system. Using a computer in your business provides you with a greater amount of data than can be retrieved with only a conventional cash register. Customer purchase history, item sales detail, stock status reports, monthly, yearly, and seasonal sales data, are only some of the detail information that can be retrieved.

This data is key to grasping total control of your business and increasing sales and profits. In addition to enhancing customer and inventory tracking capabilities, computerizing your store can also help you tighten up on security and employee tracking.

!!!Special UNIDO Offer !!!

Please let us know your Batch number and business details and we will offer you very special rate of **BD 130**

SPECIAL UNIDO OFFER

For any software purchase like Microsoft, Symantec etc. we can negotiate good rates with suppliers.
